- I. Welcome by Dan Weiner and Oksan Bayulgen
  - a. Origins of the Levant Energy workshop idea
  - b. Goals for this planning meeting
  - c. Vision and resources for the collaboration in the next few years
  
- II. Introductions by participants
  - a. Affiliation, area of expertise
  - b. Reasons for joining this workshop
  - c. Expectations from this meeting and future collaborations
  
- III. Questions for discussion
  - a. What are some key topics that are underdeveloped in this domain? What would a new collaboration on Levant energy dynamics offer to the academic literature as well as policy discussions? What might be our unique contributions?
  - b. What are the implications of a Levant focus? How best to articulate the need to study energy transition and regional security in this geographical space?
  - c. What are the anticipated outputs for this collaboration? What are the different ways we can organize our collective work? As an edited volume with an academic press? And/or engaged research through policy papers, etc.? Others?
  
- IV. Next steps
